Project Selection Template

Name: Maseeha Dawood

Student Number: ST10451669

SECTION A: Project Overview

Project Name	StudySync App
Brief Description	A mobile planner app to integrate academic calendars, send reminders, and help students manage tasks effectively.
Business Need / Problem	Students miss deadlines and feel overwhelmed due to poor planning and time management.
Strategic Alignment	Supports student success, aligns with the university's goal of improving academic outcomes and well-being.

Part B: Selection Criteria Evaluation Table

Criteria	Weight (1–5)	Project A: StudySync	Project B: AI ChatTutor	Project C: Support Portal
Feasibility	5	4	2	5
Cost	4	3	2	5
Expected Impact	5	5	4	3
Time to Deliver	4	3	2	5
Scalability	3	4	3	3
Risk Level	4	4	2	5
Technical Complexity	3	3	2	4
Stakeholder Support	4	5	3	3
Total Score (40)		32	20	33

Constraints

Constraint Type	StudySync	AI ChatTutor	Support Portal
Budget	Moderate	High	Low
Resource Availability	Mobile developers required	AI/ML expertise required	Basic web dev required
Time	Moderate development	Long development	Short development
Infrastructure	Mobile + LMS integration	AI platform & hosting	Web hosting only

7. Key Benefits

StudySync: Improves student productivity, reduces stress, and supports academic success.
AI ChatTutor: Provides 24/7 academic guidance and modern AI-driven support.
Support Portal: Centralised support access, quick deployment, low cost.

Risks and Challenges

Risk	Likelihood (H/M/L)	Impact (H/M/L)	Notes
Integration challenges with LMS	M	H	StudySync
Technical complexity, data privacy	H	H	AI ChatTutor
Low adoption of poor content	M	M	Support Portal

Mitigation includes phased testing, clear privacy policies, and engaging stakeholders for support.

Challenges

Project	Key Challenges
StudySync	Integration with LMS and ensuring mobile compatibility
AI ChatTutor	High complexity, cost, and data privacy concerns
Support Portal	Content management and ensuring adoption

Key Assumptions

Assumption	Applies to	Impact if False
Students will have smartphones	StudySync	High impact if false
University LMS allows integration	StudySync	The project cannot function without it
An AI model can be trained effectively	AI ChatTutor	Failure leads to an unusable chatbot
Content is kept updated	Support Portal	Low adoption if false

Final Recommendation

Recommended Project: StudySync App

Justification: For a university setting, the StudySync App is the best project. Although the Support Portal has a little higher cost and practicality rating, the StudySync App has a greater long-term impact and deals directly with the issue of missing deadlines and ineffective time management. Students are likely to accept it since it strikes a compromise between affordability, scalability, and practicality. It does not incur the danger of excessive complexity or cost overruns as the AI ChatTutor does. It is more

effective and engaging due to its mobile-first design, which guarantees accessibility and everyday use. StudySync is the greatest option because it offers the best balance of value and practicality, with minimal resource needs and strong stakeholder support.
